

WHAT IS **DEKOCEMENT*****

Dekocement is a decorative, composite coating based on cement, water-based acrylic resin, additives and mineral pigments. It is an ideal material for both exterior and interior surfaces. It reached the balance point between hardness and flexibility. Dekocement offers the wide patterns of finishes for walls and floors. You can design your room according to your personality with the variety of patterns, colors and glossiness. You can't find the two surfaces the same. Dekocement offers as a two component coating including latex liquid and micro powder. Dekocement at 2-3 mm thickness is ideal for environments such as shops and exteriors. It can be applied over existing materials and reduces the time needed for application and maintenance. One of the great advantages of Dekocement is that it can be used over existing surfaces, which is much more efficient compared to a traditional, polished concrete floor installation. It is suitable for under-floor heating.

DEKOCEMENT COLLECTION

Our purpose is to offer customers high-quality innovative products that will be a combination of authenticity and functionality, for walls and floors. They have been designed to aim you implement all creative ideas which come to your head. Besides our modern, versatile and highly technical products, architects and interior designers can give free rein to the imagination and achieve the exact effect they have in mind.

DEKOCEMENTTM *SILK*

Fine-grained, colored, decorative Dekocement coatings for walls and floors with high mechanical properties. It shows continuous smooth patterns with excellent cracking and abrasion resistance.

With a maximum thickness of 3mm and a short application time, it is ideal for renovation projects as it does not require the removal of existing material or reworking of openings or sockets.

DEKOCEMENT *EXPOSED*

It presents continuous coating of coarse-grain size with high abrasion resistance for walls and floors. The high abrasion resistance and mechanical properties of coarse particle size of Dekocement is totally suitable for floors of rooms, shopping, offices and so on. Its concrete version helps you get a more coarse texture and grip, guaranteeing higher durability.

DEKOCEMENT RAINBOW

This Dekocement is a highly-resistant product with great workability after application, which has the most distinct textures. Both continuous fine particle size and non-continuous coarse particle size represent the great ideas and patterns for architects, interior designers, home and business owners.

DEKOCEMENT[™] STARK

As you know, the random patterns that appear are unique to the artisan, ensuring a truly one-of-a-kind appearance. Those patterns can range from a sharp, slate-like texture to a cloudy, almost ethereal soft texture depending on the trowelling technique of the artisan.

COLORSCOLLECTION

While Dekocement is available in many colors, it tends to be used in natural gray shades which is usually the light gray found in standard cement.

The textures and colors of Dekocement offer unlimited design possibilities to suit any style or ambience.

There are many colors and patterns possibilities according to your personality.

DEKOCEMENT COLORS

Blend of delicacy and distinction, the Mate Collection of Dekocement assembles a selection of pastel colours with the matt or gloss finish. This perfect marriage impregnates romanticism to the surface due to its charming and subtle finish.
